The following criteria will be used for T&T riders to attend Invitational Competitions and Clinics (that demand riders to ride at a certain level).

1. For 2024: The average of the best 3 results will be taken from the rider's results from 6 of the past jumping leagues (number of faults) or dressage leagues (scores), depending on the discipline.
For 2025: the best 3 results from the TTEA's Leagues in 2024.
2. The list will start with the riders competing in the higher divisions, down to the riders competing in the lower divisions.
3. For Invitational competitions, a rider may compete at a higher level than they are riding in T&T if the rider can show video evidence that they can compete at the higher level of the Invitational in a safe and effective manner.
4. For clinics (with criteria demands), the rider must be competing at the height stated, either in Trinidad or abroad. (If abroad, video evidence will be required).
5. Also taken into account is if the rider has already successfully competed for Trinidad at an Invitational in another country, at the heights involved.
6. If there is limited space in a clinic, or many riders that fulfill the criteria, then we will ask our Jumping and Dressage experts to choose the better rider/ riders to attend.
7. Private Invitations are not for the purview of the TTEA. However, the TTEA will endorse the rider/s only if the Qualifying Criteria has been met.
